🧠 TT’s Tutoring Psychology

“We’re not homework helpers. We’re healers, guides, and system-builders.”

💉 1. The Tutor is a Doctor

A student isn’t a project. They’re a patient.

They walk in with:

- **Hidden pains** (topics that never made sense)
- **Emotional injuries** (shame, fear, anxiety)
- **Symptoms** (giving up, blanking out, rushing, avoiding questions)

The TT Tutor’s job:

> Diagnose the pain
>
> Prescribe the system
>
> Treat consistently with structure and strategy

🧪 2. Our Prescription = The 3-Layer Lens

We don’t throw answers.

We give students the mental tools to understand, fix, and solve.

Layer	What We Train	Why It Heals
Vocabulary	The terms	Builds clarity, reduces confusion
Method	The steps	Gives security, lowers panic
Reason	The logic	Builds mastery, ends memorization struggles

> This system works whether the tutor is a genius or not.
>
> The tutor doesn't need to feel confident - they need to **trust the process.**

🧗 3. The Vibe = Coach, Doctor, Mentor

We are...	We are not...
A mentor	A lecturer
A strategist	A solver
A coach	A performer
A partner	A parent

> We don't force understanding - we train it through process.
>
> We don't teach for correctness - we teach for **effectiveness**.

💬 4. The Student's Job = Follow the System, Not Their Feelings

Students come in with fear, frustration, self-doubt. That's normal. That's *human*.

> But our response is not "try harder."
>
> It's **"use the system."**

Because systems:

- Don't get tired
- Don't panic
- Don't give up when the concept looks scary

They break things down into steps, and **steps make anything learnable.**

🔁 5. The TT Teaching Process = Ready, Fire, Aim

Phase	Tutor Does	Student Does
Ready	Model a problem using 3-Layer Lens	Watch, listen
Fire	Makes student attempt a similar problem	Engage, apply, make mistakes
Aim	Tutor gives feedback using the lens	Reflect, correct, grow

This loop builds **understanding** - not just accuracy.

🛠️ 6. Even the Tutor Can Learn While Tutoring

We are **not afraid of what we don't know**.

If the concept is unfamiliar:

- Use a tool like **ChatGPT** to learn it fast (not during a session, before)
- Break it down using the 3-Layer Lens
- Re-teach it to the student in a simpler, cleaner way
- Empower them using the 3-Layer Lens system

> "If I can learn it through the system, I can teach it through the system."
>
> That's how every TT tutor stays coachable, adaptable, and sharp.

🧠 Final Principle:

> Our goal isn't to make students smart.
>
> Our goal is to make them **strategic.**

They don't leave our sessions just knowing answers.

They leave knowing how to **find answers**, **fix mistakes**, and **trust their minds** again.

🧰 TT Tutor Code:

> "I don't give knowledge. I build understanding."
>
> *"I don't need to be perfect. I need to rely on systems."*
>
> *"I don't push feelings. I train thinking."*

> *“I don’t fear confusion. I break it into layers.”*
